

TurnKey Internet launches TurnKey Cloud – Managed Cloud Solutions for Businesses

FOR IMMEDIATE RELEASE

Albany, NY, May 18, 2011—Web solutions provider TurnKey Internet today announced the launch of their new cloud service infrastructure, **TurnKey Cloud**, which provides scalable, reliable and cost-effective access to information technology anytime from anywhere. TurnKey Cloud enables businesses to reduce the need for expensive in-house staff, reduces infrastructure costs and moves complex IT infrastructure out of the office and into a green-friendly secure data center.

The TurnKey Cloud service infrastructure offers instant on-demand access to servers, virtual desktops, backup and storage, as well as over 12 unique Software as a Service, cloud-ready business applications. TurnKey Cloud provides a reliable, secure and remotely accessible platform for businesses that can be easily managed through a centralized web interface to automate provisioning, monitoring, and upgrading cloud-based resources.

TurnKey Cloud provides businesses of all sizes access to technology and cost benefits formerly reserved only for large enterprises. TurnKey Cloud servers provide customizable, reliable and cost-effective IT solutions, ideal for replacing traditional office servers – without the traditional high start up costs associated with purchasing equipment and software licenses. TurnKey Cloud offers businesses the ability to instantly deploy servers pre-ready with a choice from Linux, Windows 7, Windows Server 2003, Windows Server 2008 and over 100 other pre-ready operating system templates such as Microsoft Sharepoint, Microsoft SQL Server, and many more. TurnKey Cloud servers offer access to enterprise-level technology on a subscription basis starting as low as \$59 per month.

“TurnKey Cloud is IT on demand,” said Adam Wills, CEO of TurnKey Internet. “TurnKey Cloud is the next evolution in infrastructure for the IT needs of businesses. We have simplified the process of managing and adding IT infrastructure while providing scalability and reliability that meets the demands of the largest enterprises.”

The TurnKey Cloud infrastructure is fully self-healing, with extensive redundancy designed from the ground up as a scalable on-demand network of computing resources. The TurnKey Cloud infrastructure is securely accessed via the Internet, and hosted within TurnKey Internet’s datacenters located in Albany, New York. The TurnKey Cloud infrastructure is backed by on-site redundant power systems and diesel generators, green-friendly environmental systems and high performance Internet bandwidth capacity that is up to 10,000 times faster than a traditional office Internet connection.
